NEW YORK STATE | Department of Health

Field Name	Definition
County	County of residence
Country Code	County FIPS code
Year	Year the lead test was collected
Zip	Zip Code of residence
Tests	Number of children who resided in the zip code and had a blood lead test within the specified year.
Less than 5 mcg/dL	Number of children who resided in the zip code that were identified to have an unconfirmed or confirmed concentration of less than 5 micrograms per deciliter (mcg/dL) lead in their blood within the specified year.
5 – 10 mcg/dL	Number of children who resided in the zip code that were identified to have an unconfirmed or confirmed concentration of lead in their blood greater than or equal to 5 and less than 10 micrograms per deciliter (mcg/dL) within the specified year.
10 – 15 mcg/dL	Number of children who resided in the zip code that were identified to have a confirmed concentration of lead in their blood greater than or equal to 10 and less than 15 micrograms per deciliter (mcg/dL) within the specified year.
15 + mcg/dL	Number of children who resided in the zip code that were identified to have a confirmed concentration of lead in blood greater than or equal to 15 micrograms per deciliter (mcg/dL) within the specified year.
Total Elevated Blood Levels	Total number of children who resided in the zip code that were identified to have a confirmed elevated lead blood level within the specified year. Blood lead concentrations ≥ 10 mcg/dL are considered elevated.
Percent	Total number of children who resided in the zip code that were identified with confirmed elevated lead blood levels within the specified year, divided by the total number of children who resided in the zip code that had a blood lead screening test in that same year multiplied by 100.
Rate per 1,000	Total number of children who resided in the zip code that were identified with confirmed elevated lead blood levels within the specified year, divided by the total number of children who resided in the zip code that had a blood lead screening test in that same year multiplied by 1,000.
Zip Code Location	Centroid location of zip code where child lives.
County Location	Centroid location of county where child lives.
